

## Updating firmware version in the Wanderfull application

If you want to update the application with the latest firmware version, please do the following steps.

1. Go to the Settings tab, located at the bottom right of the application.
2. After you have opened the settings, click on the Firmware sub-menu on the left.

3. The latest version number of the application can be seen, for example Firmware version: **178**
4. Click on the **Update FW** button.
5. New form appears (see picture below) informing that the firmware is upgrading.

6. When the upgrade is finished, up-to-date version can be seen in the application.
