

Version 178

What's new

Newly added features:

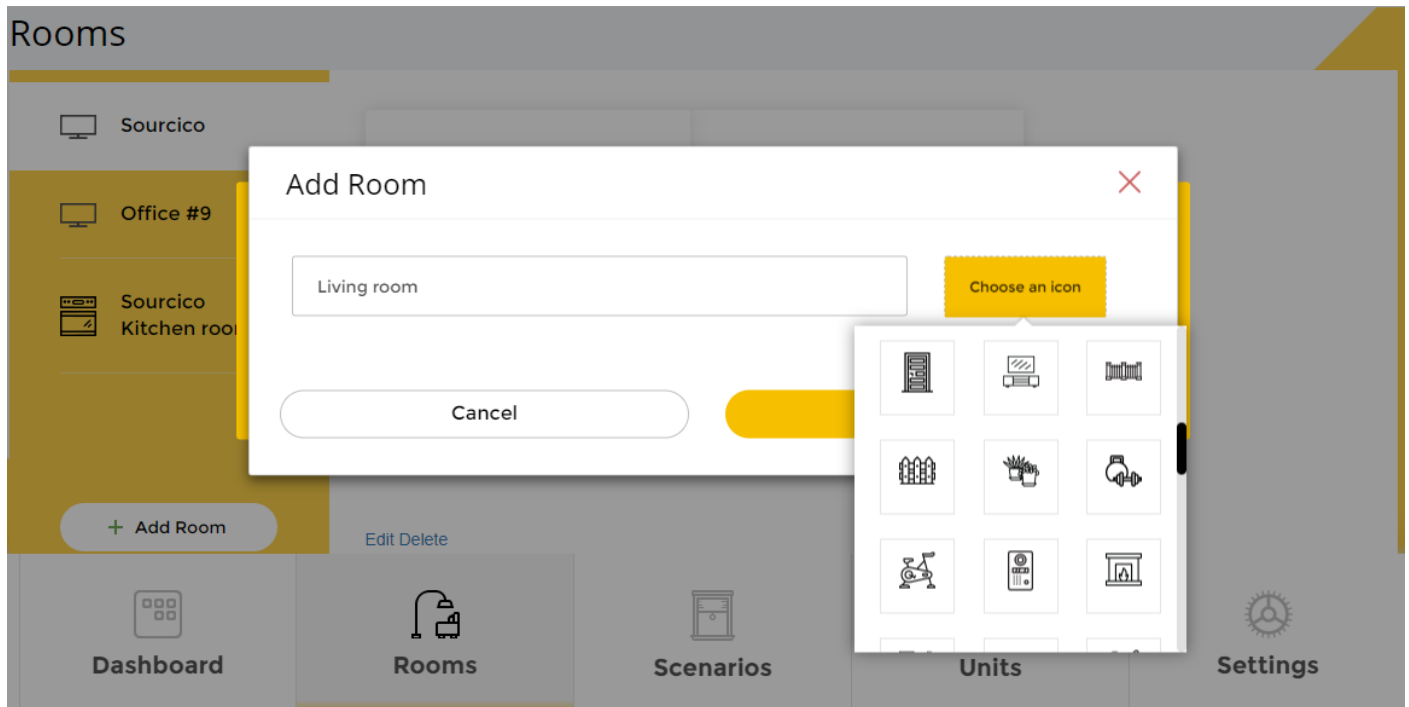

Support for PIMA 832/896 model

(for more details please see the Wanderfull technical manual)

Implementation of icons in Rooms tab.....3

Implementation of icons in Rooms tab

In the Touchwand application, please click in the Rooms tab. Once you have opened this section, go to the **Add Room** button. When adding a room for example, the user should write down the name of the room and an icon.

When clicking on the button **Choose an icon**, one window will open where the user is able to select among different icons. Every time the user will have to choose an icon; these new icons will be seen.
