

Version 192.02

What's new

Newly added features:

Dahua Cameras Support

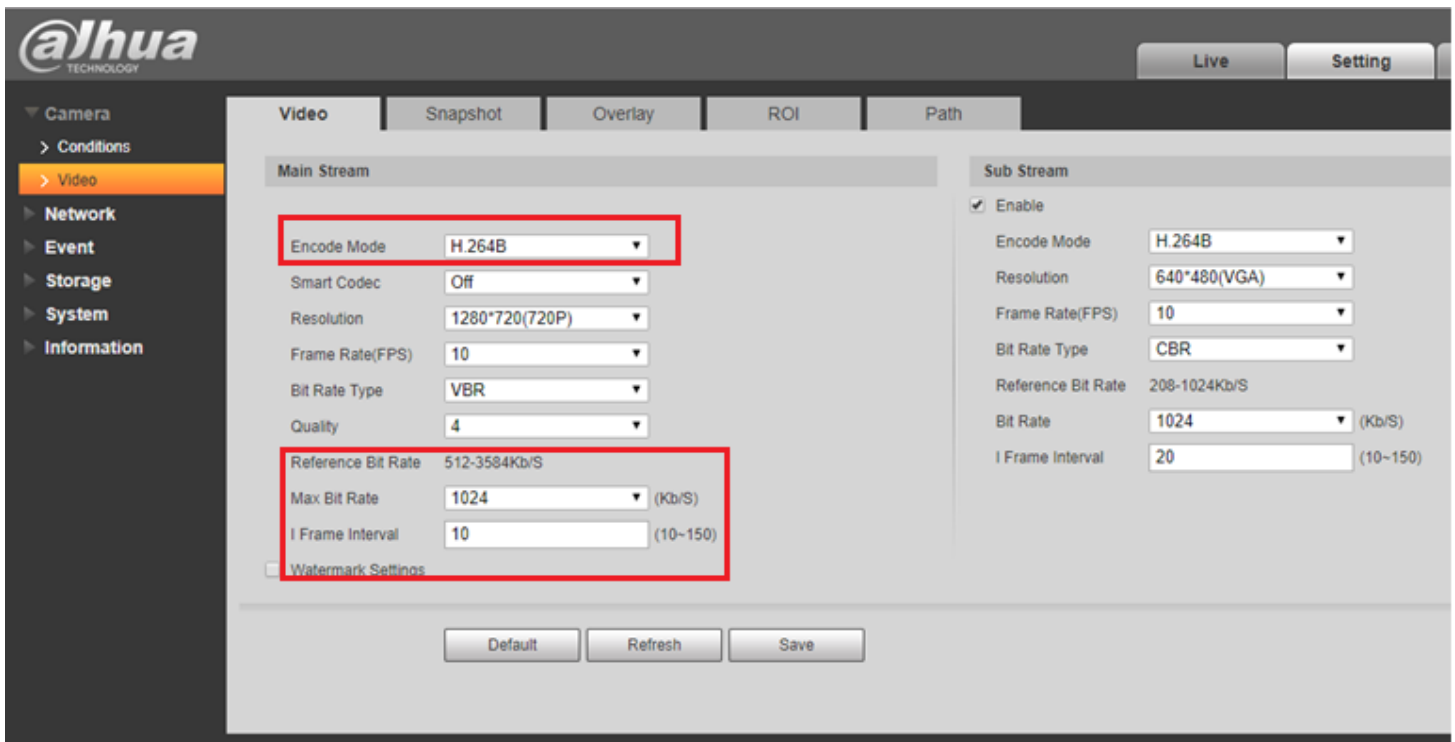

Dahua Cameras Support

Implement the following steps to install a Dahua camera in the application.

1. Login to camera IP via internet explorer. Follow instructions and install plug-in.

2. Go to Settings tab
3. Then go to Video
4. In Main Stream, compare settings with the following and press **Save** in the end:

5. Now we can add the camera to the Wanderfull controller.
6. Go to Units tab and add unit.

7. Select IP camera (ONVIF) → Local and insert username and password.
8. The camera is now added to the controller. You can assign it to a room and give it a meaningful name.
